## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 20, 27, 30-32, 37, 41, 47-49, 58, 59, 61, 70, 79, 80, 97, 99, 101-103, 119, 144-151, and 153-193 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the device of independent claims 20 and 119, in particular the additional limitation that the liquid crystal layer has an untwisted structure in its initial orientation and can be reoriented to a twisted structure by the parallel field component. (*Soref's* electric field causes the liquid crystal across the entire layer to orient along the electric field as shown in the bottom of Fig. 3, not to form a twisted structure.) Claims 20 and 119 are therefore allowed, as are their dependent claims 27, 30-32, 37, 41, 47-49, 58, 59, 61, 70, 79, 80, 97, 99, 101-103, 190, and 193.

Claim 144 is allowable because it recites ranges of  $\beta_o$  for which the applicant's evidence of unexpected results distinguishes over *Soref* and its teachings. Claim 144 is therefore allowed, as is its dependent claims 145.

The prior art does not disclose the devices of claims 146 or 147, in particular the additional limitation reciting ranges of  $\beta_o$  for which the applicant's evidence of unexpected results distinguishes over *Soref* and its teachings. Claims 146 and 147 are therefore allowed, as are their dependent claims 148-151, 153-164, and 191.

The prior art does not disclose the devices of claims 165 and 166, in particular the additional limitation that the said  $\alpha_o$  and  $\beta_o$  values impart to the image a small

Art Unit: 2871

viewing angle dependence wherein the variation of the degree of light transmission ( $1-f_{\min}/f_{\max}$ ) is, over all  $\phi$  values, below about 0.57 when  $\theta$  is up to  $45^\circ$ . [The examiner's understanding of the phrase "that the said  $\alpha_o$  and  $\beta_o$  values impart", and of the claim language regarding having a pretilt angle and an orientation angle "which prevent domain formation" or "which reduce domain formation", is that the small viewing angle dependence and prevention or reduction of domain formation would not be obtained in the device in question were other values of  $\alpha_o$  and  $\beta_o$  to be chosen.] Claims 165 and 166 are therefore allowed, as are their dependent claims 167-189 and 192.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
